Oskar Lange and State Public Planning in Creative Co-Operative System Integrated to Vertical Companies which then is State Centric and How Capital is a Creative Version of Monopoly Capital with American Integrated Models which then is Practiced as Commodity-Culture and how to do Cultural Criticism with Lange

By Prabhat Patnaik

I. State Organising in Kerala by CPIM and West Bengal's Land Reform and Deficit Public Model

Actually Lange is too European an idea, in the Indian context it works out to public planning and public state models of large deficit spending and such state-federation arguments with the center and the center adds its budget to the plan and makes it also then monopoly capitalist system and that creative dynamic for some states and cities. This means a complex arrangement of finally state led and capital led growth and development which then is finally Indian Communism.

II. Lange's Soviet Idea Actually

Instead of this mixed economic factor of production and scale of public spending and people-friendly politics centered approach of state intervention to do welfarism of all and the poor particularly which is then subjective autonomous people's participation in the democratic sense, Lange prefers in fact Soviet creativity and state creativity in the sense then of highly monopoly capital country with large scale capitalist farming and mixed state lesser and then in fact creative coffee shop type developments and commodity-culture in a law of Americanisation which is then recently (From Pushi and Amarjeet just now on Quantoff) – a type of mixed economics in the sense of Soviet creativity and American creativity and even monopoly capital based with state interstitial planning which then is complexly something like Laski and marginalism merged with spontaneous creativity.

III. Empiricism and Modelling the Process in Value of Money Ways we Now Have in CPIM, CPI and CPIML

The empiricism of this spontaneous and Soviet dynamic then is merged with Sirohi, the young Shomit Sirohi being a Hollywood film maker and Communist in old Communist ways who then is empirical to Laskism with Jewish Question raised.

Now I model this empiricism to in fact a large multinational American company-capital culture which then is modelled further into Communist cultural processes and Soviet history which then is Deterior daily for Communists. This is our conception of Deterior, the monopoly aspect in it is then daily creative life ensured for them and this then becomes the process of in history of Lenin (again Pushi and Amarjeet on Quantoff) how the Taylorism and state bureaucratic model of Taylorism which then generalizes a revolutionary culture and becomes mixed with democratic people's movements then is modernized first in Soviet ways (Gorbechov and Mesravan intervening on Quantoff) which then is complexly confused and naïve perceptions which organize the creative most Soviet countries of self-management and this then becomes today's Sirohian Laskism with creative dynamics and state mixed factor and all of this is with Cuban features and complexly is something like the process of Lenin and more Trotsky truly.

IV. Full Model of Spanish Economics at the Moment compared

In comparison our daily debate on Spain is about the creative dynamics of Spanish and EU and World Bank-IMF and Microsoft and American multinational companies mixed with Spanish Gautier company models and state sector dominance in Empresario format with people's democratic protests of PCE and People's Party which though is basically about according to us (from Amarjeet) missing the utopian dimension of

Soviet creativity which if added would be Communism from the hegemony standpoint only.

V. Giri and Slavoj’s Critique of Our View

No, it is not a Laski center for Communist parties and feminism with then monopoly capital and Americanisation continuing in it in fact more and more which is a cultural argument, of what is actually just American capital and monopoly as always with Facebook upgrade only, but in fact we prefer seeing it as a Political Centric Model of the same democratic participation which then is how India is anything goes for the rest. Deterior is just a political forum.
